ANSI/AAMA-292 (1993) pattern interchange: the fourteen-layer, block-per-piece model that ASTM D6673 adopted in 2001. It predates the ASTM additions (the system-text grammar and version identifier, notch-type layers 80-83, validation curves 84-87, the grade-rule table file). Checked against ANSI/AAMA-292; D6673 requirements added later are reported as not applicable.
